

AQUACULTURE TECHNICIAN

Hanilu Farms LLC

Cutler, Indiana

Hanilufarms.com

Join Hanilu Farms in expanding its indoor sustainable seafood production facility. While Hanilu Farms doesn't require any previous aquaculture experience, as we provide on-site training, we do require that individuals are reliable, honest, and dependable.

Job Description:

Must have a valid driver's license and a reliable mode of transportation.

Will be asked to be available for emergency situations at the facility and required to live within a reasonable travel time from the facility. (This will apply after the probationary period according to an agreed upon schedule) Some weekends will be required as well as some long hour days.

Monitor and maintain facility equipment both inside and out. Involved in the planning of production and maintenance tasks.

Maintain records of fish operations.

Daily water quality sampling and testing.

Must be able to swim, lift 50-80 lbs. repetitively, stand for long periods time, multitask, be self-motivated, able to work alone as well as with others, and have quick problem-solving skills.

Assist with all live fish moving activities, harvesting, sorting, weighing, and loading of live fish.

Be able to follow biosecurity protocols and help with developing new ones as needed.

Create and perform Standard Operating Procedures (SOPs) for specific areas of the RAS facility.

Assisting with construction and installation of equipment will be required.

Standard hours per week 33-40 hrs. Pay is experience based.
