

Disability Studies Graduate Student Association Presents

The Experience-Dependent Nature of Neural Recovery: Highlights from Arts and Neuroscience Research

LISE WORTHEN-CHAUDHARI

**NOVEMBER 30 AT 12:45PM
OHIO UNION, ROOM 3020C**

Lise Worthen-Chaudhari, MFA, MS is a Research Assistant Professor of Physical Medicine and Rehabilitation within The Ohio State University's Neurological Institute and is the Associate Director of the Motion Analysis and Recovery Biomechanics Laboratory. A biomechanist and former professional dancer, she bridges the art, math, and science of movement in order to integrate creative arts with rehabilitation science. She has more than a decade of experience conducting clinical research of central nervous system recovery, has collaborated with thought leaders such as Dr. Jane McGonigal, and has been funded by the National Institutes of Health for her work. Admission is free and open to the public.

Access Statement: This venue is wheels-accessible and can be lit by natural or fluorescent light. Attendees are asked not to wear fragranced products. To discuss access needs, contact Chad Iwertz.1@osu.edu
