

## *Job for electrical engineer students*

*We need a power meter built, that monitors the instantaneous current, voltage, frequency, and real power consumption of a average building. We are a student business team, competing against 30 teams in our class. I provide the parts, and give you a summary of how someone else did it, and will pay you to put it together correctly, \$20.*

*The Ohio State University-  
Fisher College of Business*
