

Digitizing Tradition: Exploring the Domestic Implications and Global Influence of the Indian State's Traditional Knowledge Digital Library

Digital tools and computational processes hold an increasing allure for communities wishing to preserve, protect and develop valuable informational resources of various types - including those glossed as traditional knowledge and folklore. Allison Fish will explore an early application of digital technologies to the management of intangible cultural heritage that has gained global prominence and influence - the Indian central government's Traditional Knowledge Digital Library.

Wednesday, November 15
3 - 5 pm
