

Film Screening:

ANTARCTIC EDGE: 70° SOUTH

Tuesday, March 22 - 4pm

BPCRC Auditorium, Room 240

Join us for a 70 minute film screening of *Antarctic Edge* followed by a panel discussion with Dr. Berry Lyons (School of Earth Sciences and the Byrd Polar and Climate Research Center) and Dr. David Denlinger (Departments of Entomology and Evolution, Ecology, and Organismal Biology).

Film Summary

"Antarctic Edge: 70° South is a science-in-action feature film, funded in part by the National Science Foundation, following a renowned team of scientists studying climate change in the fastest winter-warming place in the world. This documentary combines innovative science, dramatic imagery and two decades of scientific collaboration into a compelling character-driven narrative."
