

Midwest Bat Working Group

Annual Meeting
April 6–7, 2020

*Runge Nature Center
Jefferson City, Missouri*

Dear Conservation Partners:

The **Midwest Bat Working Group** provides a structure for coordination, collaboration, and communication among concerned citizens and professional biologists in state, federal, academic, and private organizations. The MWBWG is dedicated to the conservation of bats and their habitats, particularly in the Midwestern United States, and works to address bat-related issues with a regional approach. Every year, members come together to present findings and exchange information to better understand and conserve bat species in the Midwest.

This year, the MWBWG is proud to host the annual meeting at the Runge Nature Center in Jefferson City, Missouri on April 6–7, 2020. The annual meeting is highly valuable to biologists looking to collaborate on research and management of bats, as well as to professionals who promote conservation and recovery while enhancing the public's understanding of these mammals.

Each year, **VENDORS/SPONSORS** play an invaluable role in making the annual MWBWG meeting a success. Support from vendors/sponsors help to keep registration costs reasonable, thereby making it possible for those with limited budgets to attend. This meeting strives to bring professionals together to work collaboratively towards the conservation of animals facing unprecedented declines, and your direct contribution helps to make that happen!

Below is a list of vendor options and their associated benefits to help guide your decision.

In the interim, please let me know if you have any questions about being involved with the upcoming 2020 Annual Midwest Bat Working Group Meeting in Jefferson City, Missouri. This year's meeting host is the Missouri Department of Conservation and Missouri Department of Transportation. Thank you kindly for your consideration and we look forward to working with you!

Sincerely,

Brianne Walters
