Day 1: Master Grid Development

Participants will be lead through the creation of Mastery Grids from State Standards.

- Breaking down the standards into learning targets using Depth of Knowledge
- Identifying and creating essential mastery questions
- Aligning resources and assessments

Day 2: Grid Implementation

Participants will be shown how to effectively implement The Grid Method in their classrooms.

- Starting the grid
- Preparing the learning environment
- Managing learner progress
- Developing lesson structure and student goals
- Grading student work
