

Teachers, Principals, and Curriculum Directors:

We are pleased to reintroduce you to the
Wizards of Wright!

The Wizards of Wright (WOW!) is a K-12 STEM Program offered by
The Wright-Patterson Air Force Base Educational Outreach Office.

We are beginning our 26th year, and as we enter this new era, we invite you to explore the 4 Flights of the WOW! program.

Flight #1: WOW! in the Classroom

This is the WOW! you know and have used before. We offer WPAFB experts to visit your classroom and present demonstrations and hands-on activities.

Our goals include helping teachers meet STEM objectives in their curriculum, as well as introducing students to Air Force personnel and exciting STEM career ideas.

Flight #2: WOW! on Wheels

If having one of our Wizards visit your classroom doesn't work for you, you can borrow the materials you need, and present the demo yourself.

You can also borrow STEM items to use in your classroom...we offer things like beakers and graduated cylinders to microscopes and wind tunnels.

WOW! on Wheels can be delivered to you! You can borrow it for several days to several weeks, and then we'll pick it up from you when you're done.

Flight #3: WOW! TV

The future of WOW! is WOW! TV. We will offer many of our demos on video so that you can use them as you decide what demo to schedule, or learn how to run the demo yourself.

Flight #4: WOW! DIY

We will offer activity sheets and videos for quick do-it-yourself activities that students and parents can do at home.

***Participation in all of our
WOW! Flights is Free!***

For available demos and materials, or to schedule a WOW! in the Classroom Visit or a WOW! on Wheels Delivery ... visit our website - <http://wpafbstem.com>
