"De Cari is an appealing performer ... a kind of wide-eyed Alice in Numberland." — *The Boston Globe*

"Funny and insightful one-woman show ... replete with hilarious characters ... The story is riveting ... go see this show!" — *CurtainUp*

Created as a response to former Harvard President Lawrence Summers' now infamous suggestion that women are less represented than men in the sciences because of innate gender differences, *Truth Values: One Girl's Romp Through M.I.T.'s Male Math Maze* is a true-life tale that offers a humorous, scathing, insightful and ultimately uplifting look at the challenges of being a professional woman in a male-dominated field. Writer/performer and "recovering mathematician" Gioia De Cari brings to life more than 30 characters in a hilarious and deeply touching performance that has earned raves from critics and stirred audiences to standing ovations.

An ideal conversation starter about issues concerning women in math and science, *Truth Values* is a personal story that is written for everyone.
