OHIO STATE ADVANCE PRESENTS:

“BREAKING THE BIAS HABIT: A WORKSHOP TO PROMOTE GENDER EQUITY”

HOSTED BY THE CENTER FOR EMERGENT MATERIALS AND THE SOCIETY FOR WOMEN IN PHYSICS

This workshop introduces participants to the concepts of unconscious biases and assumptions about gender by treating the application of such biases as a “bad habit.” Participants will uncover their own biases through use of an Implicit Association Test and discover underlying concepts and language used in the psychological and social psychological literature to describe such processes. Proven strategies for reducing the application of these biases will be provided. Breaking the Bias Habit® is a registered trademark of WISELI and the Board of Regents of the University of Wisconsin System.

3:00-5:00PM on Monday, January 30, 2017
Smith Seminar Room (1080), Physics Research Building
RSVP and prerequisite bias test available at cem.osu.edu
