Fellow Fish Lovers,

I mean that in a nice way to all of you. I have strived to overcome the problems of being successful in the fish business for many years. Fox Country Farms has been more than happy with our improvement of the quality of fish food and at a lower price. We have hopefully helped all of you with fingerlings at a great price. Aeration is one thing I feel we hit a home run on. Getting to know all of you and enjoying your conversations and hospitality has made the last few years some of the best of my life.

At this time Rob and Heather have decided to leave the business. I, after 5 heart attacks, 2 broken legs and a crushed pelvis and bad back (who doesn't have that), I am going to listen to my wife (almost a first) and at 68 years of age I am going to slow down. This means I'll farm less fish and catch more for fun. This means I'll still try to get all of us the best price on food. This means fingerlings are more than I can do.

I refuse to leave everyone in the cold so I made a deal with Sweetwater (Mark Eichenberry) to supply us (me included) with fingerlings for the same price I would be charging for this year. This year's fingerlings will be of a quality we have become used to.

Last year was bad because of the winter but this year looks better and our worst year was better than others ever produced any year. Also getting delivery should be as dependable as all of our other years.

We will continue to supply feed as long as possible. We will try to help with anything we can do to assist each other. Please try and understand this is the best I could do for us and I am sure Mark will do you right as he has always done for me.

Call with questions or problems. I'll try as always to help. 740-968-0912.

Jim Wagner

P.S. Bluegills and bass are bringing the highest prices I've ever seen. Good Luck!
