

JOIN US FOR A **WEBINAR:**

Strengthening Aquaculture Associations

Many associations related to aquaculture have been formed in the United States over the years. Some have prospered while others have not fared as well. Strong associations, particularly those that represent aquaculture producers, are more important than ever!

This 1-hour webinar will discuss the value of producer-driven aquaculture associations and provide examples of successes achieved by several associations. New projects underway in the North Central Regional Aquaculture Center to strengthen state aquaculture associations will also be described.

A free webinar hosted by
the **North Central Regional
Aquaculture Center**

Presented by
Dr. Carole R. Engle

Carole Engle is an aquaculture economist with more than 35 years of experience in the analysis of economics and marketing issues related to a variety of aquaculture businesses across the U.S. She has also worked closely with aquaculture associations over the years. Current efforts include working with the North Central Regional Aquaculture Center and the National Aquaculture Association to identify and implement strategies to strengthen state aquaculture associations in the North Central Region.
