

## **Aquatic Animal Welfare**

*Free Webinar*

The U.S. Aquaculture Society and National Aquaculture Association are hosting a free webinar entitled, ***Aquaculture Animal Welfare***, at 11:00 am (Eastern Standard Time) on Friday, October 19, 2018.

Aquatic animal welfare standards are being voluntarily adopted or regulated into existence in other countries; sometimes these rules are based more on public perception and opinion, rather than science. Four speakers will present an update on these efforts in various parts of the world (European Union, Norway and Australia), which can be compared with the situation in the United States.

Speakers include:

- Craig Watson, Director, University of Florida, Tropical Aquaculture Laboratory, Ruskin, Florida.
- Howard Browman, Principle Research Scientist, Institute of Marine Research, Austevoll Research Station, Storebø, Norway.
- Ben Diggles, Director, DigsFish Services Pty, Ltd, Bribie Island, Australia.
- Randy MacMillan, Vice-President for Research, Technical Services and Quality Assurance, Clear Springs Foods, Buhl, Idaho.

The webinar will be coordinated from Auburn University with the help of the Alabama Cooperative Extension System. To register, please visit:
