The OSU Social Behavior Interest Group
Colloquium Series Presents:

When Worldviews Collide:
What Do We Really Know About the Accuracy of Real-world Judgments?

Dr. Philip Tetlock
University of Pennsylvania

Thursday, September 27th :: 4:00 - 5:00PM
Psychology Building 035

There are massive bodies of experimental research on cognitive biases in researcher-designed laboratory tasks but surprisingly little is known about the determinants and correlates of accuracy in high-stakes real-world judgment tasks. This talk will provide an overview of past research on the accuracy of expert political judgment as well as the most recent findings from a large-scale forecasting tournament sponsored by the Intelligence Advanced Research Projects Agency.
